

GULSHAN KUMAR presents

8 WEEK FAT LOSS PROGRAM

MUSCULAR 8

e-Book

Fitness Guideline | Veg & Non-Veg Nutrition Plan | Workout Plan

Diet Principles & Guidelines

- 1. Burn Fat at an extremely efficient rate
- 2. Keep metabolism at an optimal rate throughout the diet
- 3. Promote optimal Recovery
- 4. Maintain Muscle Mass
- **5.** Emphasize your ability to maintain a High energy level in the Gym.

Nutrient and Macronutrient Balance

You will never reach your goal of becoming shredded, if your body does not receive a proper balance of macronutrients and micronutrients. This must be distinctly understood, or nothing good can come out of this article! In other words, if you try and force your body into a state of fat burning, by starving it of one or more nutrients, you will hit a plateau in a head on collision that won't be easy to recover from that being said, it is my intension to include everything in your diet so as to keep your body running at 100 percent of its capacity, and in turn it will reward you by maintaining a high metabolic rate. Lets analyze these concepts:

MACRONUTRIENTS //

Proteins You will get plenty of protein in this diet. Each meal will be chalk full of this vital food source. Too many people make the mistake of lowering their protein. This is one of the most costly things you can possibly do! Without adequate protein you will lose your muscle at an extremely high rate and sabotage your fat burning efforts.

Fats Those who say all fats are bad for you are, of course, dangerously incorrect. As it turns out, plant-based fats are powerful cancer fighters, If you want to prevent cancer, or you're currently battling colon cancer, prostate cancer or breast cancer, it is essential to get plant-based fats into your diet on a daily basis. The healthy fats include extra-virgin olive oil, flax seed oil, and fats from plant sources such as nuts, seeds, peanut butter and coconuts. They also improve your cardiovascular health and fight weight gain and obesity

Carbs All of your carbohydrates will come from fibrous sources. You will not be allowed any simple sources unless you are taking in your post workout shake. The role they will play is to spare protein, maintain energy levels in the gym, and also induce the release of insulin post workout. Remember, after you workout, your body releases cortisol (see take your fat burning to the next level) at an unmatched rate! Cortisol has been proven to lower thyroid hormone output. The lower your output in this area, the slower your metabolic rate will become.

MICRONUTRIENTS //

Vitamins & Minerals A game that many athletes play with their diets is to regular intake their vitamins. In other words, they take them when they feel like it, and that is a rarity! You need to take a multivitamin and multi mineral everyday without fail.

ESSENTIAL SUPPLEMENTS //

I will emphasize two supplements that everyone should take during MUSCULAR 8 program.

Whey Protein I highly recommend to everyone is a quality protein supplement. Protein supplements can make your life much easier and make sure you don't miss out on this essential nutrients. Protein is everywhere. Everything you see in the mirror is protein—your hair, your skin, your eyes, and your muscles. Protein is responsible for tissue growth and repair

Protein supplements can be taken at any time during the day when you need a snack or a meal replacement. But I recommend taking a protein shake directly after your workout so that you can give your muscles the nutrients to kick start recovery and growth.

Remember to follow the serving size as it's recommended for each individual protein supplement so that you don't overdue the calories. Watch MUSCULAR-8 "POST WOKOUT" video for more info.

Pre Workout A good pre-workout supplement will cover your bases with quality branched-chain amino acids, creatine, beta-alanine, and betaine, not to mention stimulants like caffeine to amp up your focus and training intensity, boost muscle strength and endurance, enhance muscle pumps, and promote muscle growth.

For stimulants, your best and safest bet is caffeine. It's one of the most studied sports nutrition supplements on the market and frequently shown to improve athletic performance. Not only does clinical research show that caffeine is very safe, but that it even may enhance overall health. For performance benefits, you need a minimum of 200 mg of caffeine before workouts to be effective. Watch MUSCULAR-8 "PRE WOKOUT" video for more info.

Putting It All Together

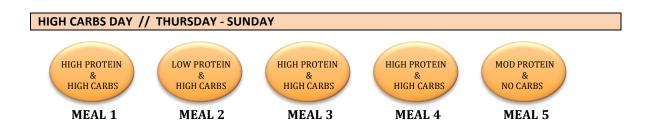

If you take each of the micro and macronutrients into consideration, and give them their proper dues, then you will get the following out of the diet:

- 1. A higher metabolic rate throughout the diet
- 2. A better pump in the gym.
- 3. You potentially will maintain all of your muscle mass 4. You will recover faster
- 5. You will feel more refreshed
- 6. You will not be as sore
- 7. The list can go on and on, but suffice it to say that the above concepts are vital to your success!

WEEKLY MACRONUTRIENT INTAKE

LOW CARBS DAY // MON-TUES-WED-FRI-SAT HIGH PROTEIN LOW PROTEIN HIGH PROTEIN HIGH PROTEIN MOD PROTEIN NO CARBS LOW CARBS LOW CARBS LOW CARBS NO CARBS MEAL 1 MEAL 2 MEAL 4 MEAL 5 MEAL 3

Monday through Saturday, You have to take carbs at breakfast and dinner (60min after post workout meal), rest of the meals will be no carbs meal. Your total carb intake will be around 120g. During low carb diet our main focus is to burn maximum fat and deplete muscle glycogen. As our protein intake is more than 1g per pound body weight, which will help to grow muscle and provides you energy.

On Sunday, which is your recovery day means non-training day, you have to take carbs in every meal except last meal. A purpose of adding carbs on Sunday is to refill your muscle glycogen, which you depleted during low carbs day. Eating low carbs diet for longer period of time will slow down your metabolism which is a engine to burn calories, so its important to eat carbs after every 3RD day to speed up the metabolism.

NON-VEG PLAN

NON VEG	WORKOUT DAYS – LOW CARBS (MON-TUES-WED-FRI-SAT)	RECOVERY DAY – HIGH CARBS (THURS-SUN)
BREAKFAST	SCRAMBLED EGGS & NUTS	OATS
8-9AM	-6 Egg Whites	-½ cup Oats
	-1/2 cup Kidney Beans	-½ Apple
	-2sp Onions	-2sp Raisins
	-2sp Tomato	-2sp Peanuts
	-1 handful Spinach	-4 Boiled Egg Whites
	-3sp Peanuts	
SNACK	APPLE PEANUT BUTTER	BANANA BREAD TOAST
11-12PM	-1 Apple	-2 Slice Wheat Bread
	-1 ⅓sp Peanut Butter	-1sp Peanut Butter
	-5g Cinnamon	- ½ Banana
LUNCH	CHICKEN & VEGETABLES	CHICKEN & RICE
2-3PM	-100g Grilled Chicken	-100g Grilled Chicken
	-1/2 cup Black Kidney Beans	-1/2 cup Black Kidney Beans
	-30g Sweet Potato (Optional)	-1cup Rice
	-1/2 cup Green Beans	-1/2 cup Green Beans
	-1/2 cup Green Bell Pepper	-1/2 cup Green Bell Pepper
	-1/2 cup Broccoli (or Cauliflower)	-1/2 cup Broccoli (or Cauliflower)
	-2sp Onion	-2sp Onion

	-2sp Tomato	-2sp Tomato
PRE W/O	PRE W/O SUPPLEMENT	
5PM	-1scoop C4 Extreme	
	-200ml Cold Water	
	OR	
	PRE W/O WITHOUT SUPPLEMENT	
	-½tbs Coffee (Nescafe)	
	-240ml Hot Water	
WORKOUT		
POST W/O	POST W/O SUPPLEMENT	
6-7PM	-1-2scoop Whey Protein	
	-300ml Cold Water	
	-3 Dates (Khajoor)	
	OR	
	POST W/O WITHOUT SUPPLEMENT	
	-6 Boiled Egg Whites	
	-3 Dates (Khajoor)	
DINNER	OMELET BEANS WRAP	OMELET & ROTI
8-9PM	-120g Grilled Chicken Breast	-2 Whole Eggs
	-2 Whole Eggs	-4 Egg Whites
	-2 Egg Whites	-2sp Onions
	-½ cup Black Beans	-2sp Tomato
	-2sp Onions	-1 Roti
	-2sp Tomato	-1cup Low Fat Yogurt
	-½ Peach (Optional)	-1sp Ketchup
	-30g Boiled Potato	-Salt/Pepper/Garlic Power
	-2sp Yogurt	
	-¼ cup Non Fat Cheese (Optional)	
	-1sp Ketchup	
BEFORE	-Salt/Pepper/Garlic Power ALMOND MILK	ALMOND MILLY
BED	-1cup Low Fat Milk	ALMOND MILK -1cup Low Fat Milk
10-11PM	-1 Cup Low Pat Milk -2 Green Cardamom	-1 Cup Low Fat Milk -2 Green Cardamom
	-2 Cloves	-2 Cloves
	-Pinch Cinnamon	-Pinch Cinnamon
	-20 Almonds (crushed)	-20 Almonds (crushed)

WORKOUT

WORKOUT SPLIT

Your schedule will be weight training on Monday to Wednesday and Friday, Saturday, you will perform abs on Tuesday, Thursday and Saturday, then you will do cardio from Monday to Saturday means 6 days a week. Cardio will be performed on the treadmill, stationary bike and elliptical. You'll keep repeating this pattern for all 8 weeks.
